Data Sheet

Version V2R1M0

ariadne software ltd, cheltenham, england

ariadne

the iSeries specialists

Product Name	CoolTools
Short Description	Manage and convert spooled files quickly and easily, online or in batch. Integrates with ariadne's CoolSpools and Communiqué products to let you convert and email batches of spooled files you select using a variety of criteria. PDM-style "Work with" for spooled files.
Functions	<ul style="list-style-type: none"> • Automatic spooled file processing. New spooled files created with a "ready" status on an output queue are automatically detected and processed • Processing occurs based on spooled file rules and spooled file scripts that you define. • WRKSPLFPDM command provides a PDM-style "work with" for spooled files. Select spooled files by: user, name, job, date, outq, usrdta etc. etc. then use PDM-style options (including user-defined options with substitution variables) to process the selected spooled files. • Equivalent batch command RUNSPLFCMD allows a set of spooled files to be selected and have an option or command run against each spooled file in turn.
System requirements:	<ul style="list-style-type: none"> • OS/400 V5R1M0 • CoolSpools for spooled file conversion • Communiqué for email
