Product Name	<b>Slipstream</b>
Short Description	Want to produce extracts (text or CSVs) or Excel spreadsheets from your iSeries database? Want to save query or SQL output as a spreadsheets or CSVs? Want to do this simply and easily on the iSeries without messy PC file transfers? You need Slipstream!
Product Abstract	Slipstream converts iSeries database files to native Excel spreadsheets, CSVs or other delimited file formats (e.g. tab-separated), fixed-length text files and HTML tables. It integrates with Query/400, QM/400 and SQL to let you save the output from those functions in any of the supported formats. It does all this without the need for a PC, so conversions can be easily built into your overnight batch applications to run automatically and there's no need for users to run PC file transfers during the day. Select and sort records; include, exclude and sequence fields; apply numeric, date and time editing. Integrates with Communiqué to allow output to be emailed.
Inputs	iSeries or AS/400 database file (physical or logical). Query/400 object (*QRYDFN) QM/400 object (*QMQRV) SQL command string Source member containing SQL command.
Outputs	Stream file in one of the following formats: <ul style="list-style-type: none"> <li>• Excel spreadsheet (native Excel .xls BIFF8 or BIFF5 file)</li> <li>• CSV</li> <li>• Other delimited file format (e.g. tab-delimited, semicolon delimited)</li> <li>• Fixed-length flat text file (ASCII or EBCDIC)</li> <li>• HTML table</li> </ul>
System requirements:	<ul style="list-style-type: none"> <li>• OS/400 VR51M0 or above</li> <li>• No PC necessary (all conversion run exclusively on the iSeries)</li> </ul>
Options	<ul style="list-style-type: none"> <li>• Select records</li> <li>• Sort records</li> <li>• Include, exclude and sequence database fields</li> <li>• Apply numeric, date and time editing</li> <li>• Manage CCSIDs</li> <li>• Set authorities</li> <li>• Email (requires Communiqué <a href="http://www.ariadnesoftware.co.uk/Communique.htm">http://www.ariadnesoftware.co.uk/Communique.htm</a>)</li> </ul>
